**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-5 rejected under 35 U.S.C. 102(e) as being anticipated by Lim (US006349224B1).

With respect to claim 1 and 4, Lim discloses an apparatus and method for providing fast mobile connectivity during a data communication (see column 3 and lines 7-40), comprising:

Receiving an initial communication from a first wireless communication device operating in a wireless communication system (see figure 5);

Determining if an initial communication from a first wireless communication device operating in a wireless communication system comprises a request to initiate a data communication (See column 4 and lines 30-46);

Determining an identification code associated with a second wireless communication device, said identification code determined from said initial communication (see column 46-49);

Determining if said second wireless communication device is operating within said wireless communication system (see column 4 and lines 50-66); and

Routing said data communication to said second wireless communication device without the use of an IWU that is a bank of modems if said initial communication comprises a request to

Art Unit: 2682

initiate said data communication and said second wireless communication device is operating within said wireless communication system (see column 4 and lines 66-column 5 and line 14).

It is inherent that the whole process needs a processor and storage device to execute fore information.

With respect to claim 2, 3 and 5, it is inherent that every conventional wireless communication system comprising: a database including HLR and VLR, MSC or BSC. And the function of database is to keep tracking the terminal users within the system either visitor or home and inform either the MSC or the BSC whether to do switch locally or to other parties.
